

Invariant subspaces of J -dissipative operators in Π_κ and zeros of holomorphic functions

M. Denisov

In the talk we will consider the relationship between the existence of maximal semidefinite invariant subspaces of J -dissipative operators in a Pontryagin space Π_κ and the number and a location of zeros of holomorphic functions of a special type.

The research is supported by the RFBR grant 08-01-00566-a.
